## Abbey Grange Academy – Leeds

---

The project consisted of a 2-storey classroom extension to the existing academy with a new assembly hall and feature entrance. The surrounding area provided additional car parking facilities to the academy.

The building is steel-framed with pre-cast concrete floors. The ground conditions led to the adoption of a pre-cast driven pile solution for the foundations with a suspended ground floor slab. The extension is connected into the existing buildings with 2 link corridors to provide adequate circulation.

The building was successfully constructed to a tight time scale in order to meet the requirements of the academy timetable.

**Client:** Abbey Grange Multi Academy  
**Contractor:** Strategic Team Group  
**Architect:** Farrell & Clark LLP

**MSJ Commission:** Structure and Civils design and detailing

Melia Smith & Jones were commissioned to design and detail the sub- and superstructure elements of the buildings and the site drainage for the scheme.
