
Highway Design

MSJ have prepared designs for numerous housing estate road schemes. These schemes are normally adopted under a Section 38 agreement with the Local Highways Authority.

MSJ can produce all the relevant drawings and associated details for these schemes. These typically include plans, sections, kerb details, horizontal and vertical alignment and setting out co-ordinates.

MSJ can also produce layouts and designs for industrial estates and car parks. Some typical examples of these are retail parks, sports centres and weigh bridge arrangements.

MSJ use Autotrack software to produce swept paths to ensure that the layouts are efficiently designed and easy to use.

To complement the highway design MSJ have the capability to design and detail the required drainage and co-ordinate this with the entire scheme..
