
Owner's Engineer Role

Stack - Lakeside EfW

Bunker slipform set-up - Lakeside EfW

Melia Smith & Jones have worked for many clients advising and acting as the Owner's civil engineer. The role is often part of a larger client team and usually involves a close working relationship with the process engineers and operations teams.

Various levels of appointment have been undertaken to suit the clients requirement:

- Civil work scope documents
- Civil works specifications

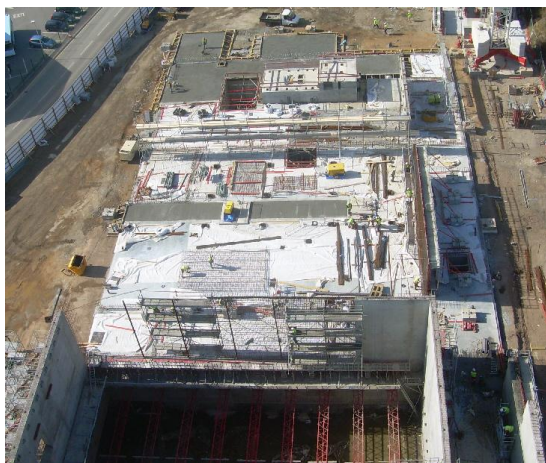

Feed hopper columns – Sheffield ERF

Ash handling area - Riverside EfW

- Procurement options
- Buildability and phasing issues
- Cost estimates
- Review of contractors design proposals
- Review of site works in accordance with work specifications and good working practice
- Advice on contract and project administration
- Advice on potential claims and variations
- Verification of milestone payments

Boiler/Process hall - Jersey EfW

Boiler Structure - Grimsby EfW
