Client: Glazzard (Dudley) Ltd

Overall Client: Westfield

MSJ Commission:
Design of balustrades, canopies,
light box framing

Westfield Stratford City is the gateway to the Olympic Park and the largest urban shopping centre in Europe. The main shopping area is set over three floors with over two kilometres of balustrade.

MSJ's role included design of the cantilever glass balustrade tracks which had numerous different support configurations whilst maintaining the same outward appearance. The central food court is a multi-function space, the voids being temporarily filled in for special events. A design was developed to allow for the removal of the balustrade panels, including bespoke trolleys to transport the balustrade to the storage space.

There were numerous other elements on the project with which MSJ were involved. These included light box supports, canopies, lift shaft cladding supports and shop front features.
